

Information for Authors

CHECK THE PES AUTHOR'S KIT (<http://www.ieee-pes.org>) FOR THE LATEST DETAILS.

The IEEE TRANSACTIONS ON SUSTAINABLE ENERGY is a quarterly publication that welcomes contributions in the following areas: Biomass, Combined Heat and Power, Fuel Cells, Geothermal Electricity, Small Hydro Design and Applications, Solar Photovoltaics, Solar Thermal Electricity, Tidal and Wave Energy, Ocean Thermal Energy Conversion, Wind Turbine Generators, Battery and Storage, Energy Efficiency, Hydrogen Technology, Grid Interaction of Sustainable Energy Sources, Carbon Capture from Power Generation, and Mitigation of Greenhouse Gas Emissions.

Paper Preparation

Basic guidelines for preparing papers are provided in Part 4 of the Author's Kit. Information is given regarding desktop publishing format, type sizes, and typefaces. Style rules are provided that explain how to handle equations, units, figures, tables, references, abbreviations, and acronyms. Sections are also devoted to the preparation of acknowledgments, references, and authors' biographies. An example of the desired layout for papers is provided in PDF format and as a Microsoft Word template.

TRANSACTIONS papers are limited to eight pages at submission. If a paper becomes longer than eight pages after review, it will be subject to mandatory page charges.

Submission Information

An author submits a manuscript by uploading a word processing file (.doc, .rtf, or .ps) of the paper directly onto ScholarOne Manuscripts, a site on the World Wide Web where papers can be accessed by the TRANSACTIONS Editor-in-Chief, Editors, and Reviewers. It will be converted to a PDF file by the system. (*It is recommended that the PDF file be under 1 MB. Papers exceeding this file size may require a longer review time.*) See Part 2 of the Author's Kit for complete instructions.

Upon Acceptance

Upon acceptance of a paper for publication, the author is required to upload the following final files to ScholarOne Manuscripts:

- 1) Latex or Microsoft Word source file of the paper;
- 2) PDF file of the paper;
- 3) separate graphics files in Word, eps, ps, tiff, ppt or Excel format if the graphics are not embedded in the source file;
- 4) biosketches and photos of all authors.

In addition, the author will be required to submit a completed IEEE Copyright Form electronically via ScholarOne Manuscripts if it was not completed during the initial submission of the paper.

A proof of the paper will be sent to the corresponding author for review and approval.

ORCID Required

All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. To create an ORCID, please visit: <https://orcid.org/register>. The author will need a registered ORCID in order to submit a manuscript or review a proof in this journal.

Discussions and Closures

The IEEE PES Executive Office handles the submission of discussions and closures. Please see Part 5 of the Author's Kit for complete submission requirements and deadlines. It is recommended that discussions and closures be limited to one formatted page including figures and tables, though contributions of up to 1500 words will be accepted. Discussions and closures may be rejected if they exceed the page limit and they must be submitted to the IEEE PES Executive Office by the deadline date. The IEEE PES Executive Office will forward copies of all written discussions to the corresponding author of the subject TRANSACTIONS paper and will request that a written closure be submitted. Closures must be submitted within three weeks (five weeks outside of North and Central America) of the request. If there is no response by the deadline, it will be assumed that no closure will be supplied.

Power Engineering Letters

This section of the TRANSACTIONS offers a vehicle that speeds publication of new results, discoveries, and developments. The section affords authors the opportunity to publish contributions within a few months of submission to ensure rapid dissemination of ideas and timely archiving of developments in our rapidly changing field. Original and significant contributions in applications, case studies, and research in all fields of power engineering are invited. Of specific interest are contributions defining emerging problems and special needs in specific areas. Authors are encouraged to submit contributions to the Letters Section offering new insight to established techniques, concepts, and methodologies in electric power engineering. Such contributions are distinctly different from discussions of papers recently published in the TRANSACTIONS, in that the former seek to broaden the scope, and point to potential enhancements to existing and established technologies.

Submissions are limited to three formatted pages. Those exceeding this limit will not be reviewed. An author submits a manuscript by uploading a word processing file (.doc, .rtf, or .ps) of the letter directly onto ScholarOne Manuscripts where it can be accessed by the Power Engineering Letters Editor-in-Chief, Editors, and Reviewers. It will be converted to a PDF file by the system. See Part 2 of the Author's Kit for complete instructions.

Copyright

It is the policy of the IEEE to own the copyright to the technical contributions it publishes on behalf of the interests of the IEEE, its authors, and their employers, and to facilitate the appropriate reuse of this material by others. To comply with United States copyright law, authors are required to sign and submit a completed IEEE Copyright Form. This form returns to authors and their employers full rights to reuse their material for their own purposes.

Open Access

This publication is a hybrid journal, allowing either Traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Upon submission, if you choose to have your manuscript be an Open Access article, you commit to pay the discounted \$1,750 OA fee if your manuscript is accepted for publication in order to enable unrestricted public access. Any other application charges (such as over-length page charge and/or charge for the use of color in the print format) will be billed separately once the manuscript formatting is complete but prior to the publication. If you would like your manuscript to be a Traditional submission, your article will be available to qualified subscribers and purchasers via IEEE Xplore. No OA payment is required for Traditional submission.

Mandatory Page Charges

The author or his/her company or institution will be billed \$110 per each page in excess of the first eight published pages. Payment of these charges is not negotiable or voluntary. Further, submission by the author of his/her manuscript to these TRANSACTIONS signifies acceptance of the requirement to pay mandatory page charges. The Publisher holds the right to withhold publication of the current submission or any future submissions from the author if this charge is not honored.

Color Charges

IEEE now offers the option to print figures in grayscale but post online free of charge. Any color figures submitted will be automatically processed by IEEE for online color. The color-in-print charge is a flat rate of \$275 per figure. The corresponding author of the article will have the opportunity to address the color-in-print option during an "Article Setup" step. All invoices and payments are handled through an automated payment portal system. The payment portal allows various payment types such as credit card, bank wire transfers, check, pre-approved waivers, special payment circumstances, and third party billing. Please note that split payments are not supported at this time. If you have any questions, please contact oaprocessing@ieee.org for Open Access processing and reprints@ieee.org for all other charges.
